Features

- **Fingerprint Sensor**
  - BGA package consisting of a die mounted on a polymer substrate sensor
  - 9.3 mm x 9.3 mm active imaging area fingerprint sensor
  - 360 DPI 132 x 132 pixel array at 8-bits per pixel resolution
  - Great image quality with polymer, plastic, and ceramic coatings < 100µ in overall thickness
  - 32-bit Arm® Cortex®-M0 CPU w/32KB Firmware Flash
  - Noise-suppression technologies for the battery chargers, displays, and radios in the device
  - Secure firmware updates via bootloader, allowing future product enhancements
  - Self-calibration and self-testing
  - Factory tuned with on-chip baseline storage, no field tuning required
  - Optional False Touch rejection

- **System Performance**
  - Fingerprint image capture and transfer to host MCU < 200ms
  - <1% FRR at FAR > 1:100K using CY-supplied matching SW including 360° finger rotation
  - 14 Finger Identify Match Time: ~500ms (average)
  - Live Finger Complete Acquisition Time (Get_Image): ~224ms

- **Embedded Environment**
  - Embedded Framework (CYFPEF) provided for porting into host processor
  - Recommended MCU Features: Cortex M4, 256KB of flash, and 96KB of RAM
  - Ability to import and export templates securely
  - Configurable security levels (1:10K to 1:1000K FAR)
  - Simple secure external communication protocol over MCU UART Interface

- **Sensor Communication Interface**
  - SPI slave bit rates up to 7.8 Mbps
  - Strong 256-bit AES encryption optionally secures the system interface from sensor to the host processor

- **Power (configuration-dependent)**
  - Operation of single 3.3-V supply
  - 1.71 V to 1.95 V direct digital supply or 2.0 V to 5.5 V via LDO
  - 2.65 V to 5.5 V analog supply
  - <80-mW active power (average power while sensing)
  - 8-µW typical deep-sleep power
  - 400-µW Finger detection power @ 10 detects per second

- **Industrial Operating Temperature Range**
  - −40 °C to +85 °C

- **Package Options**
  - 52 BGA package
  - 11.50 x 11.50 mm External Dimensions

Optional Features

- False finger rejection limiting host processor interruptions
- Fake finger rejection (anti-spoofing)
- Programmable finger detection timing (Wake-on-Finger)
- Navigation

Part Ordering Code Definitions

- Precise Biometric Matcher:
  - 0 = Offered
  - 1 = Not offered

- Coating Color Code:
  - 00 = Default, Solder mask only
  - 01 = Black Matte
  - 02 = Black Glossy

- Temperature Range:
  - I = Industrial
  - A = Automotive

- Sensor Code:
  - 0030 = Polymer, 52 BGA, 9.306 x 9.306 mm sensing, 11.5 x 11.5 x 0.80 mm

- Silicon Generation:
  - 1: FPG1

- Family Code:
  - FP = Fingerprint

- Company ID:
  - CY = Cypress

All devices in the CYFP1 family comply to RoHS-6 specifications, demonstrating the commitment by Cypress to Pb-free products. Lead (Pb) is an alloying element in solders that has resulted in environmental concerns due to potential toxicity. Cypress uses the nickel-palladium-gold (NiPdAu) technology for a majority of the lead frame-based packages.

A high-level review of the Cypress Pb-free position is available on our website. Specific package information is also available. Package Material Declaration Datasheets (PMDDs) identify all substances contained within Cypress packages. PMDDs also confirm the absence of many banned substances. The information in the PMDDs will help Cypress customers plan for recycling or other “end of life” requirements.
